

Stiv

Our Cyber Threat Intelligence Spy

Cyberint.
Protection Beyond the Perimeter

Meet Stiv, our Cyber Threat Intelligence Spy.

By looking beyond your perimeter, Stiv collects and analyzes real-time, targeted cyber threat intelligence, directly focused on your business. The intelligence he collects is contextual and actionable, so that you can react in real-time and be better prepared for attack. His colleagues call this proactive cybersecurity.

Stiv uses his predictive capabilities to inform organizations if and when the next attack is likely to come, such as DDoS and APT attacks, data leakage, and stolen credentials which can compromise your organization.

How does Stiv make this happen?

Stiv uses CyberInt's Argos platform to automate 90% of his intelligence processes.

How does it work?

Argos automates the intelligence process which includes: Collection, Analyses and Distribution of cyber threat intelligence.

The collection process allows Stiv to collect everything he needs to know about your organization's data and online assets.

These include:

- Data found on forums/websites; the Dark Web (Tor/I2P Networks), the Deep Web, and the Open Web
- Company Data on Social Networks (LinkedIn, Twitter, Reddit, Facebook, Google+)
- Paste sites
- Chats and IRC Channels
- And millions of other sources

Once Stiv collects all the information he needs to know about a company's data, he works with his automated tools, along with his team of analysts, to perform the following analyses:

- Utilizing Argos, Stiv benefits from ontology and machine learning algorithms to distil the collect intelligence based on accuracy and relevancy.
- NLP algorithms assist in extracting the right data for analysis.
- Attribution of Risk Analysis, TTP, and threat actors are added to the relevant indicators. These algorithms are what make up the Argos platform.

Stiv Mitigates Threats with his Team of Analysts

Your adversaries are constantly targeting your company with malicious threats, plotting the next breach and gathering the necessary tools for attack. In order to stay one step ahead, Stiv uses his team of highly skilled analysts, who augment the intelligence which has been collected..

And, since businesses' resources are stretched to the limit, Stiv's elite cyber intelligence team will be there to support you and to provide actionable insights and mitigation plans. So that all potential threats can be dealt with, either via automated processes or human efforts, before they materialize into events.
